

Buster Cubes Are Easy to Use:

1. Be careful not to pinch your fingers when turning the tube. For filling and easy cleaning, the central cylinder can be removed. Put your finger into the hole of the cylinder and turn towards **MAX**. Turn **counter-clockwise** until you hear a sound. Now it is possible to extract the cylinder. When replacing the cylinder, please note that the tabs on the cylinder are three different sizes and should be placed into the three slots of corresponding size in the opening of the cube. Turn the cylinder **clockwise** towards **MIN**. When you hear the click sound, the cylinder is back in place and will turn only between **MIN**. and **MAX**.

2. Put the dry food into the Buster Cube through the opening.

3. Turn cube to distribute the food into the various compartments inside.

4. Turn the central cylinder in the Buster Cube to adjust the level of difficulty.
